

TOPS TECH Task 6 (CS)

Task-6 Google Advance Search Operators Pending

- 1. Use Google search operators to find publicly accessible PDF files about IPL cricket rules. List the exact search query you used and share 3 working links you found.**

Ans:

Finding PDF Files Related to Java Interview Questions Using Google Advanced Search Operators

Objective:

- Use Google advanced search operators to find PDF files related to Java interview questions from the website geeksforgeeks.org and list three working search queries.

Query 1:

- site:geeksforgeeks.org filetype:pdf "Java interview questions"
- This query searches only within geeksforgeeks.org and displays PDF files containing the exact phrase "Java interview questions".

Query 2:

- site:geeksforgeeks.org ext:pdf "Java interview"
- This query restricts results to PDF documents on geeksforgeeks.org that contain the phrase "Java interview".

Query 3:

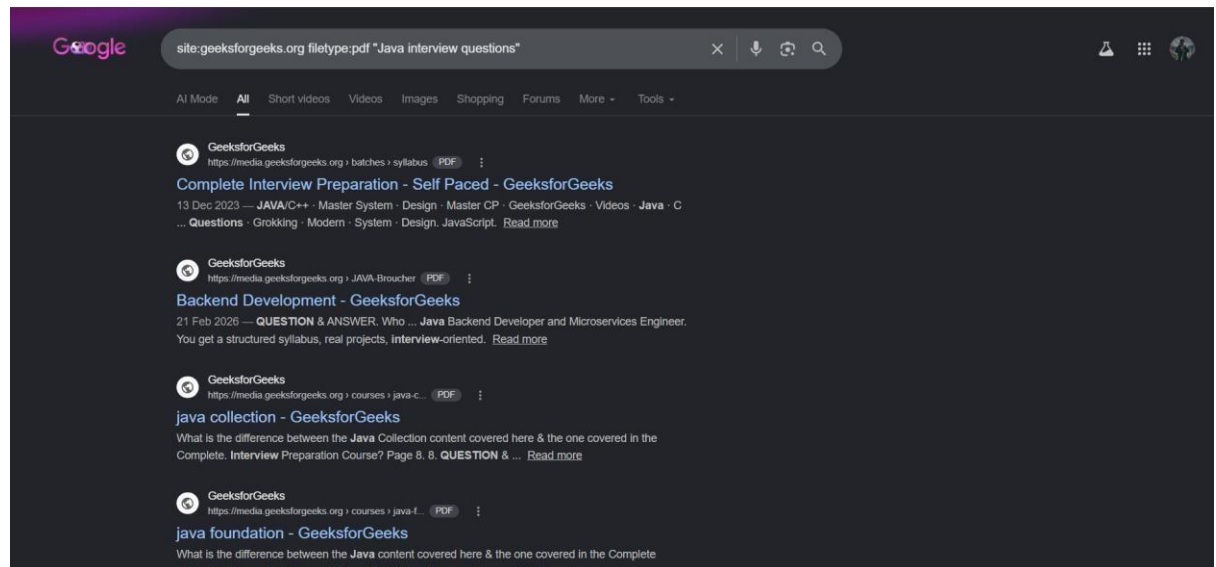

- site:geeksforgeeks.org filetype:pdf Java "interview questions"
- This query finds PDF files hosted on geeksforgeeks.org that include both the terms "Java" and "interview questions".

⇒ Google advanced search operators such as "site:" and "filetype:" can

TOPS TECH Task 5 (CS)

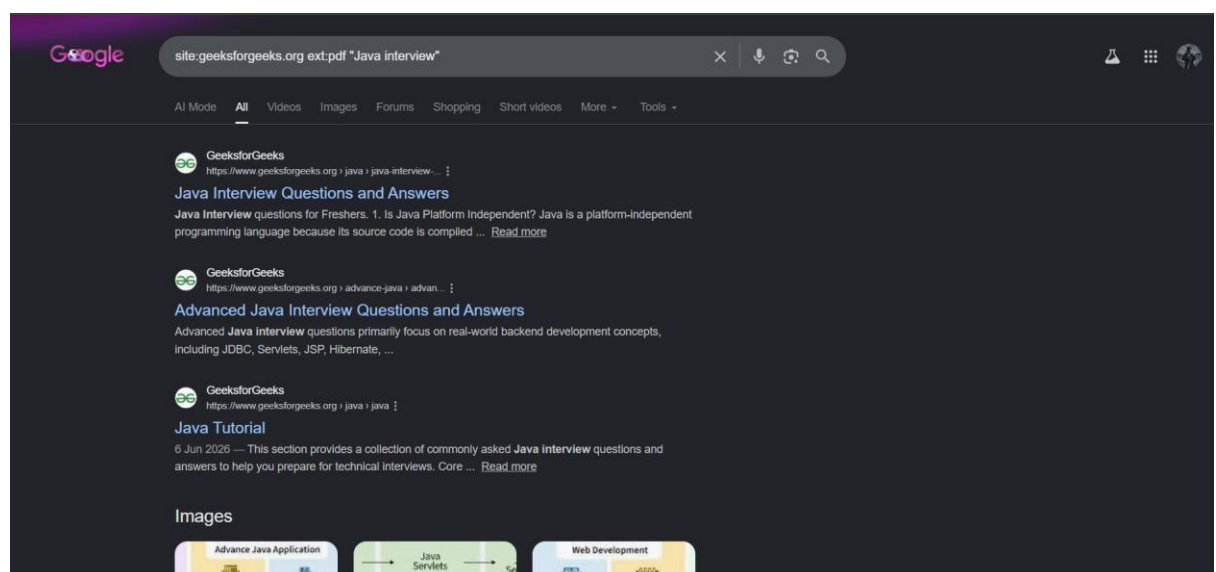

effectively narrow down search results to specific file types and domains, making it easier to locate relevant resources such as Java interview question PDFs from GeeksforGeeks. Query 1:

→ `site:geeksforgeeks.org filetype:pdf "Java interview questions"`

Query 2:

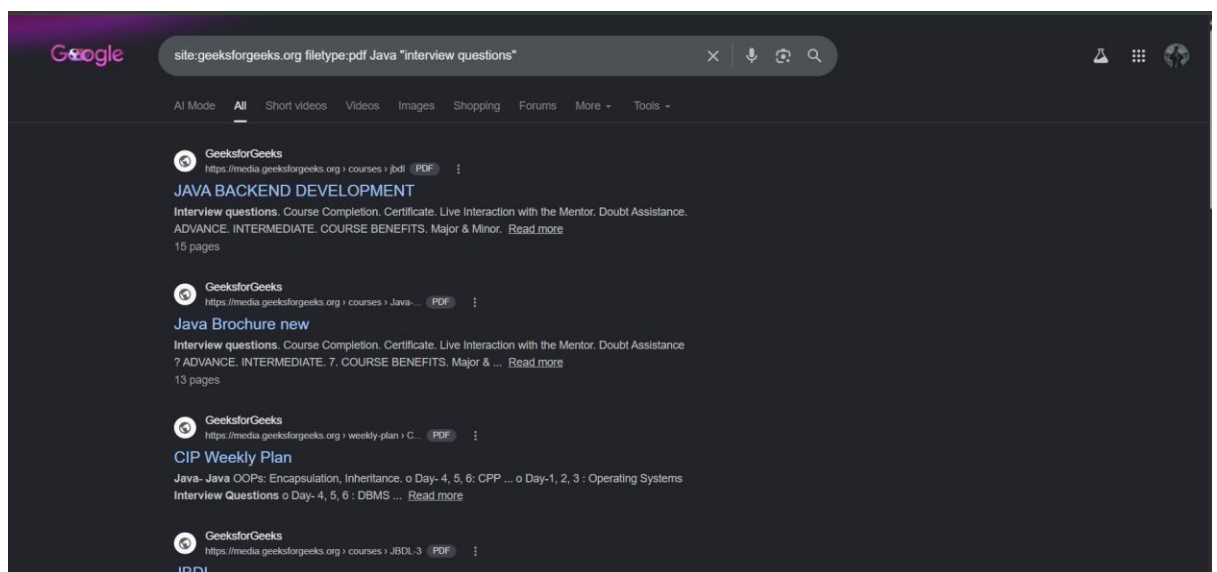

→ `site:geeksforgeeks.org ext:pdf "Java interview"`

TOPS TECH Task 5 (CS)

Query 3:

→ site:geeksforgeeks.org filetype:pdf Java "interview questions"

2. Use Google search operators to find publicly accessible PDF files about IPL cricket rules. List the exact search query you used and share 3 working links you found.

Ans:

Searching for Instagram Bug Bounty Reports Using Google Advanced Search Operators

Objective:

- To search for publicly available Instagram-related bug bounty reports hosted on HackerOne using Google advanced search operators.

TOPS TECH Task 5 (CS)

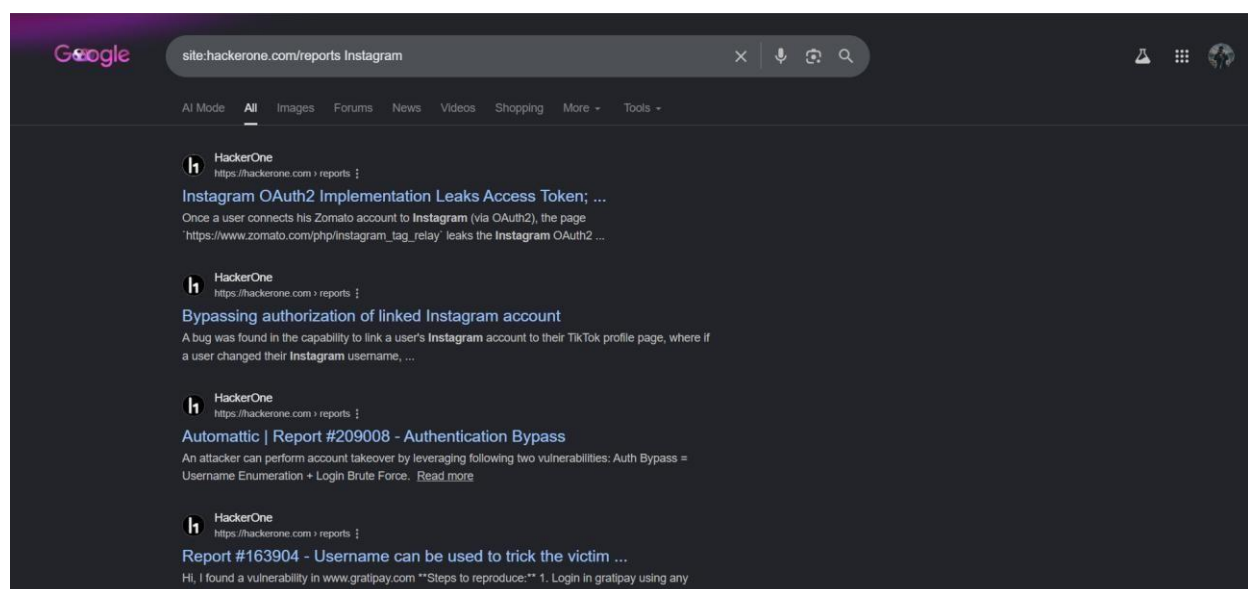

Query:

site:hackerone.com/reports Instagram

⇒ This query restricts Google search results to the HackerOne reports section and retrieves reports containing the keyword "Instagram".

Google Search Operators Used:

- site: – Limits the search to a specific domain (hackerone.com).
 - Keyword Search (Instagram) – Finds reports related to Instagram.
 - URL Restriction (/reports) – Focuses the search on HackerOne report pages.
- ⇒ The search query successfully returned multiple HackerOne reports containing references to Instagram. Examples of the results obtained include:
- Instagram OAuth2 Implementation Leaks Access Token
 - Bypassing authorization of linked Instagram account
 - Other publicly disclosed HackerOne reports related to Instagram.

3. Find Flipkart coupon pages that are not linked from the main site by using Google dorking techniques to search for 'coupon' in the URL but exclude results containing 'expired'.

Ans:

Finding Flipkart Coupon Pages Using Google Dorking Techniques

Objective:

- To discover Flipkart coupon pages using Google advanced search operators and exclude pages containing the word "expired".

Query:

- site:flipkart.com coupon -expired

⇒ This query searches for Flipkart pages that contain the word "coupon" in the URL while excluding pages that contain the word "expired".

Google Search Operators Used:

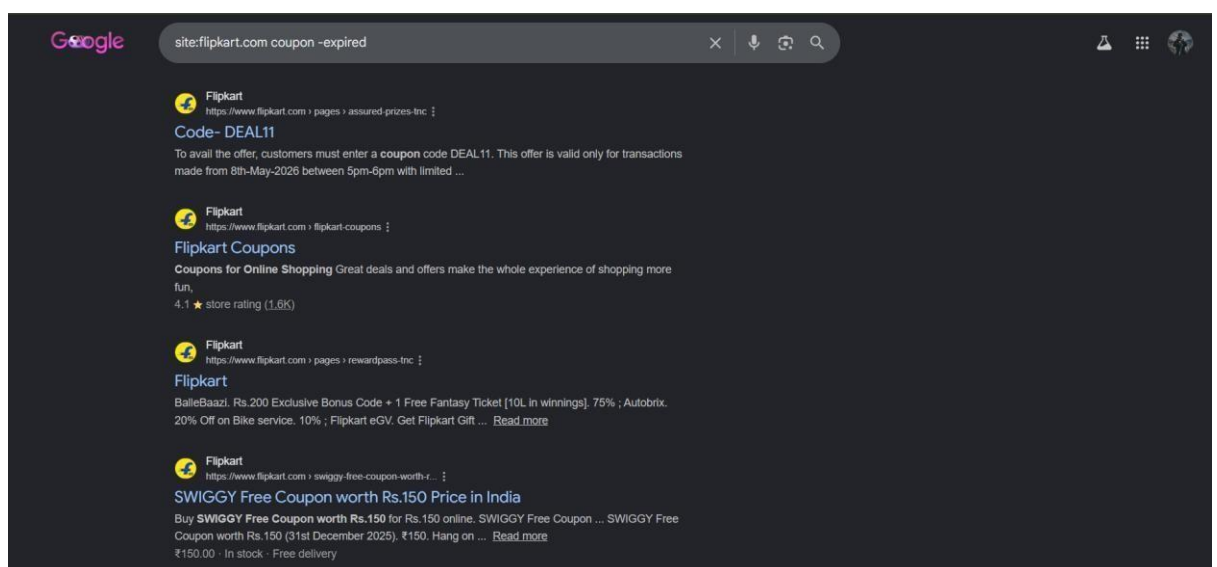

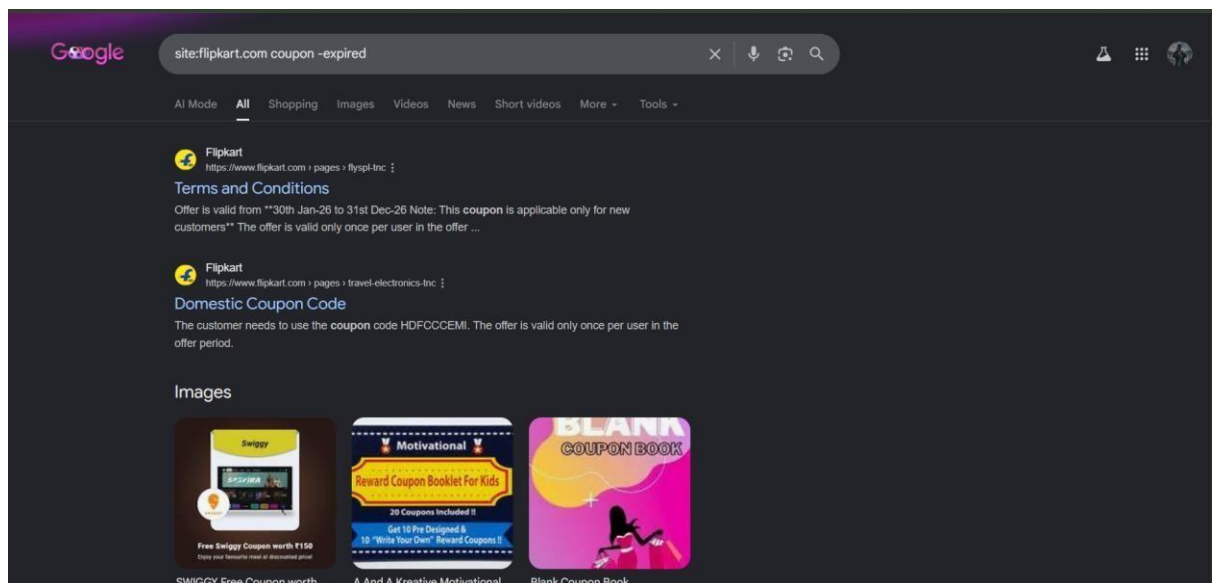

- site: – Restricts search results to the Flipkart website.
- coupon – Searches for coupon-related content.
- -expired – Excludes pages containing the word "expired".

⇒ The query returned Flipkart coupon-related pages while filtering out results containing the word "expired". This helped identify active or relevant coupon pages indexed by Google.

⇒ Google dorking techniques can be used to efficiently locate specific content on a website. By combining the "site:", "inurl:", and exclusion operators, search results can be refined to locate coupon pages while avoiding expired content.

TOPS TECH Task 5 (CS)

Query: ○ site:flipkart.com coupon -
expired

TOPS TECH Task 5 (CS)

4. Use Google search operators to discover public Google Drive folders containing IPL cricket match highlights and list 2 queries that return actual folders.

Hint: Try using 'site:drive.google.com' and filetype:mp4 or keywords like 'IPL'.

Ans:

Discovering Public Google Drive Content Related to IPL

Objective:

- To use Google Advanced Search Operators to find publicly indexed Google Drive content related to IPL (Indian Premier League).

Query 1:

→ site:drive.google.com IPL

Query 2:

→ site.google.com "IPL highlights" mp4

⇒ These queries are used to search for IPL-related content by restricting results to Google domains and identifying publicly indexed files and resources.

Google Search Operators Used:

- site: – Restricts search results to a specific domain.
- "IPL highlights" – Searches for the exact phrase.
- mp4 – Searches for video-related content.

⇒ The first query successfully returned publicly indexed Google Drive

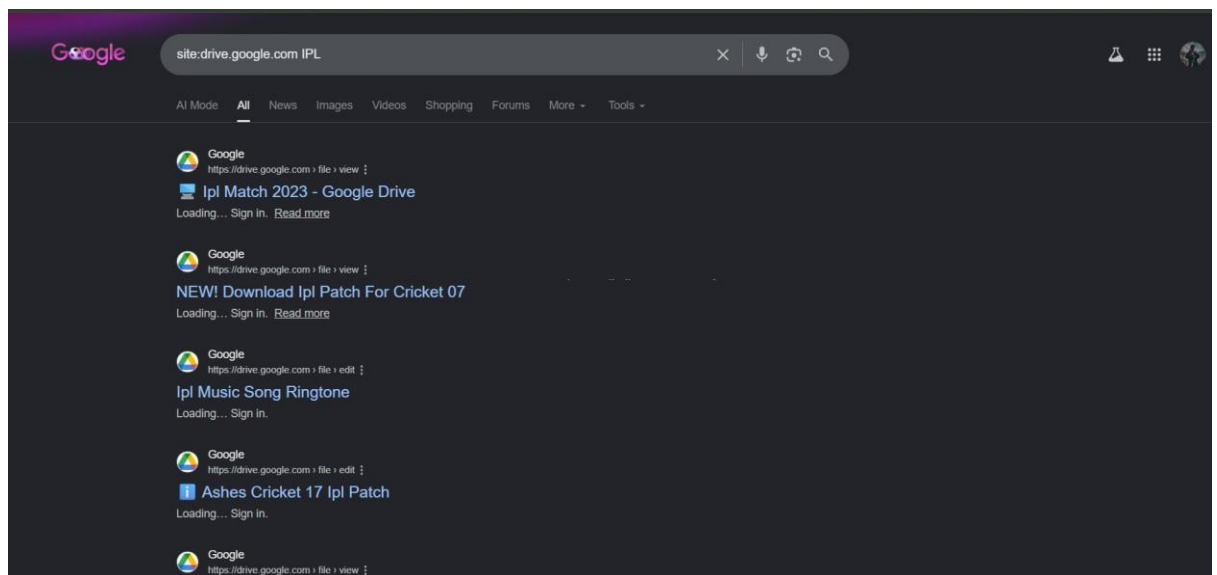

TOPS TECH Task 5 (CS)

content related to IPL. The second query was executed to search for IPL highlight videos; however, limited public results were available at the time of testing.

- ⇒ No public MP4 results were found. Alternative search results were used.
- ⇒ Google Advanced Search Operators help narrow search results to specific domains and content types. Using the "site:" operator made it easier to locate IPL-related content available through Google services.

Query 1:

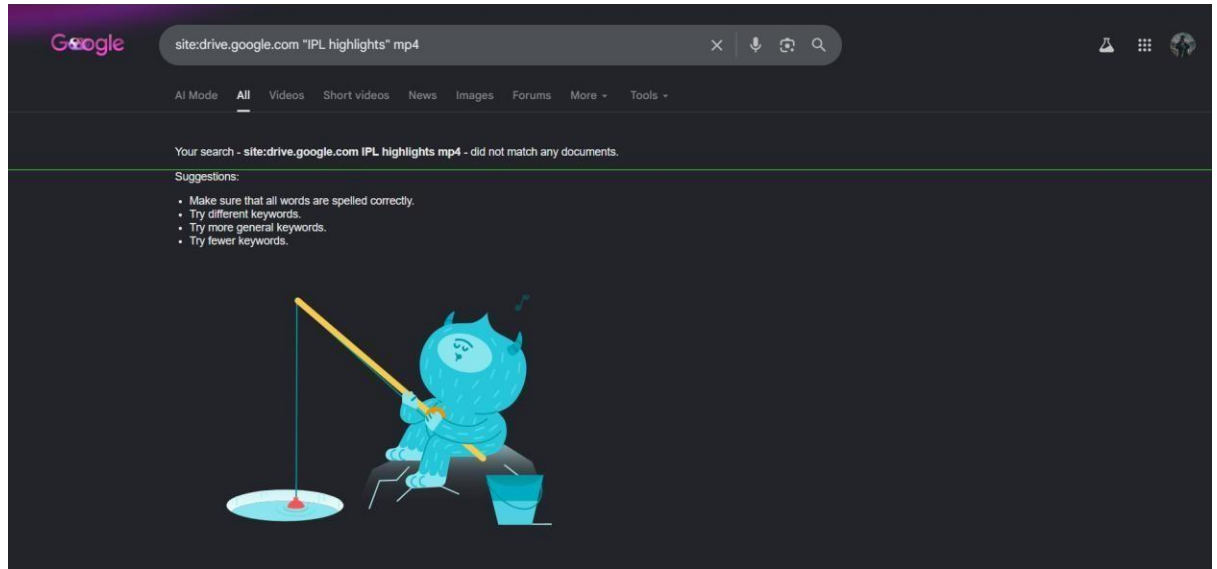

→ site:drive.google.com IPL

Query 2:

→ site.google.com "IPL highlights" mp4

TOPS TECH Task 5 (CS)

5. Use ChatGPT to generate 3 unique Google advanced search queries that could help you find leaked email addresses related to any Indian fintech app (like Paytm or PhonePe) and test at least one of them in Google. Paste the queries and describe your results.

Ans:

Finding Publicly Available Email Addresses Related to an Indian Fintech Company

Objective:

- To use Google Advanced Search Operators to identify publicly available email addresses associated with Indian fintech companies.

Query 1:

→ site:paytm.com "@paytm.com"

Query 2:

→ site:paytm.com contact "@paytm.com"

Query 3:

TOPS TECH Task 5 (CS)

→ site:paytm.com careers "@paytm.com"

⇒ These queries are designed to locate publicly available Paytm email addresses from pages indexed by Google.

Google Search Operators Used:

→ site: – Restricts search results to a specific website.

→ "@" – Helps identify email address patterns. → contact
– Searches for contact-related pages.

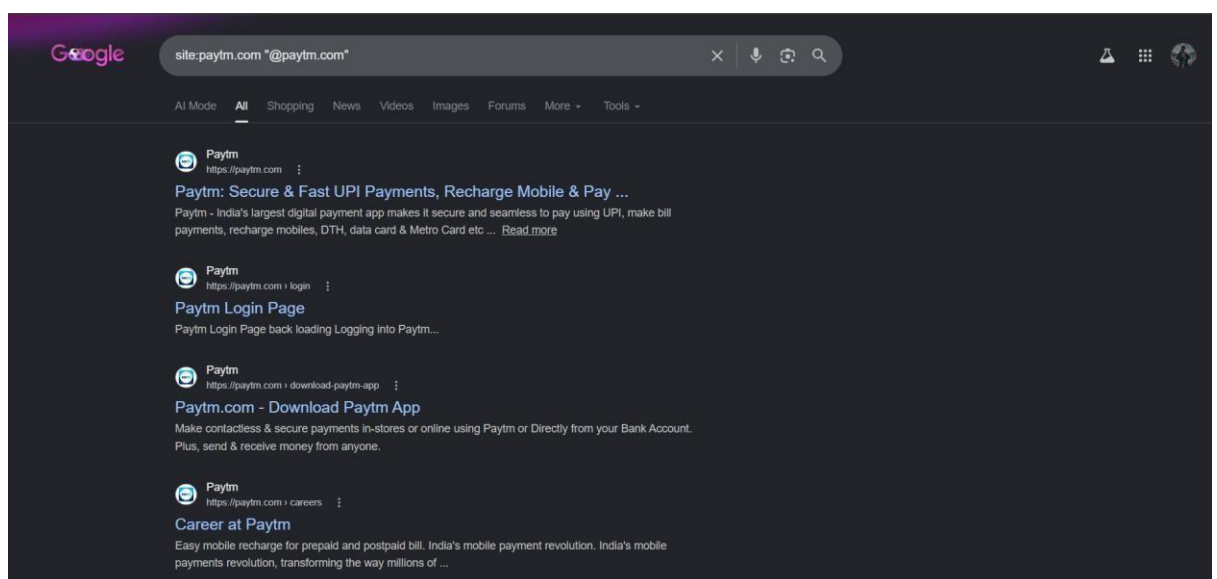

→ careers – Searches for recruitment and career-related pages.

⇒ The search queries returned Paytm-related pages that may contain publicly available contact information, support details, or career-related communication channels.

⇒ Google Advanced Search Operators can be used to efficiently locate publicly available contact information on a specific website. The "site:" operator helps narrow the search to a targeted domain, making information discovery more effective.

Query 1:

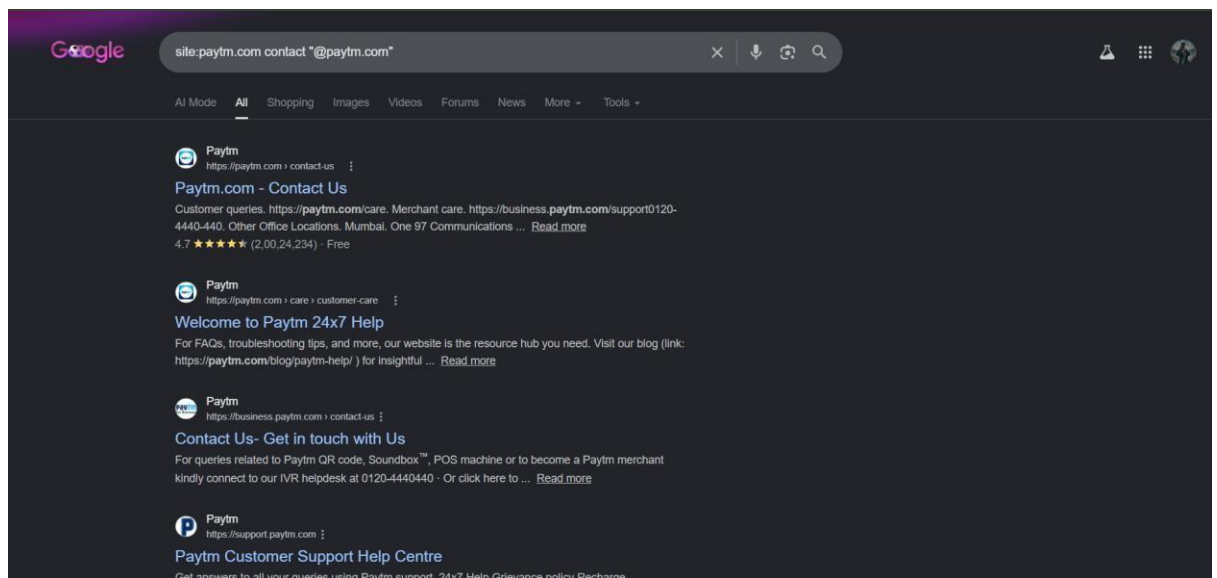

→ site:paytm.com "@paytm.com"

TOPS TECH Task 5 (CS)

Query 2:

→ site:paytm.com contact "@paytm.com"

Query 3:

→ site:paytm.com careers "@paytm.com"
